SUMMARY

Senior Frontend Engineer and Technical Lead with 6+ years of experience architecting high-performance web applications using React, Vue.js, and TypeScript. Proven track record leading frontend teams, driving performance optimization, and shipping scalable products used by thousands of users. Experienced in leveraging AI-powered tools to automate development workflows, accelerate delivery, and improve code quality. Strong full-stack capabilities with Python and Node.js backend experience.

SKILLS

Languages	JavaScript (ES6+), TypeScript, Python, HTML5, CSS3
Frameworks	React, Next.js, Vue.js, Nuxt.js, Node.js
State & Data	Redux, Zustand, Pinia, React Query, GraphQL, REST APIs
Styling	Tailwind CSS, SCSS/Sass, Styled Components, Material-UI
Testing	Playwright, Jest, React Testing Library, Cypress
Tools & DevOps	Git, Vite, Webpack, Docker, GitHub Actions, CI/CD, Vercel, AWS
AI & Productivity	Claude Code, OpenAI Codex, GitHub Copilot, workflow automation

EXPERIENCE

Founding Frontend Engineer — Jan 2023 - Present

GetDot.ai (AI Data Analytics · Lorch, Germany · Remote)

- Lead frontend engineer driving UI architecture for an AI-powered data analyst platform trusted by Duolingo, Choco, Airbyte, and BlaBlaCar, serving 50+ enterprise clients
- Architected mobile-first responsive redesign and organization-wide schedule management with server-side filtering, sorting, and pagination using Vue.js, TypeScript, and Python
- Built full-stack features across frontend and backend, including API endpoints for branding settings, empty DataFrame handling in agentic flows, and server-side pagination
- Built advanced data visualization features including cell-level conditional formatting, heatmaps, and bar charts, increasing user workflow efficiency by 60%
- Implemented infinite scroll, pull-to-load chat history, real-time chat isolation, and race condition fixes, supporting 70-100K monthly queries
- Led migration from TestCafe to Playwright for E2E testing and fixed CI pipeline concurrency issues, reducing flaky test failures
- Reduced bundle size by 25% and improved Core Web Vitals scores by 40% through code splitting, lazy loading, and performance optimization

Lead Frontend Engineer — Jun 2024 - Apr 2025

Influx AI (Blockchain Analytics & AI · Johannesburg, SA · Remote · Contract)

- Led frontend development of a blockchain analytics dashboard with AI-powered chat, smart contract scanning, wallet profiling, and token safety scoring using React, TypeScript, and Next.js
- Architected and shipped a major dashboard rebuild, introducing subscription management, trending token discovery, and real-time DEX transaction views
- Built AI chat interface with contextual token analysis, network-aware filtering, improving user engagement with on-chain data
- Developed the company marketing website and token claim client, integrating Web3 wallet connections and on-chain transaction verification
- Implemented dynamic safety score visualizations, smart contract flag severity systems, and wallet detail views for multi-network token analysis

Lead Frontend Engineer — Jul 2023 - Jan 2025

HumDov (Enterprise CMS · Texas, US · Remote)

- Led a cross-functional team of 4+ frontend developers, delivering 15+ features on schedule with 99.9% uptime for an enterprise CMS platform
- Architected a modular React component library and design system, reducing development time by 50% and ensuring consistent UI across 20+ pages
- Established CI/CD pipelines with automated testing, cutting deployment time from 2 hours to 15 minutes
- Mentored 3 junior developers through code reviews and pair programming, achieving 100% team retention and skill advancement
- Led the recruitment process for 2 senior and 1 mid-level developer through technical interviews and onboarding

Frontend Engineer — Nov 2022 - Jun 2023

HumDov

- Developed responsive React components and REST API integrations, contributing to 40% improvement in user engagement metrics
- Implemented automated testing with Jest and React Testing Library, achieving 85% code coverage and reducing production bugs by 45%
- Optimized bundle size through code splitting and analysis, improving page load times by 35%

Web Developer — Nov 2020 - Jul 2021

Unlimited.ng (Kwara, Nigeria)

- Built a full-stack bootcamp registration platform using React and Node.js, automating enrollment and reducing administrative overhead by 60%
- Led client acquisition and delivery for 15+ web projects, generating $50K+ in revenue over 9 months
- Designed and delivered web development curriculum for 5+ students, achieving 100% completion rate and 80% job placement

PROJECTS

Auritrack — AI-powered personal finance platform · React, TypeScript, Next.js, Supabase, Python

- Founded and built a full-stack finance management app with AI chat, Telegram bot, smart bank statement imports, and spending predictions, serving thousands of users across 50+ countries (4.8/5 rating)

Open Source Contributions — Ubuntu, SigNoz, ClickHouse, BioDrop, Defaang

- Contributed 20+ merged pull requests to major open-source projects, including UI fixes, documentation improvements, and feature additions
